ABHIJEET SINGH SANDAL

Full Stack Software Engineer

+91 88268 50701 | New Delhi | abhisand30@gmail.com | LinkedIn | Portfolio | LeetCode | GitHub

SUMMARY

Full-stack software engineer with production experience building SaaS and AI-enabled applications using Next.js, TypeScript, Node.js, and PostgreSQL. Delivered systems across AI recruitment, AI calling, e-commerce, payments, and MLS property data, from client requirements through backend integrations and deployment. Experienced in production maintenance, third-party integrations, and database-backed workflows.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, SQL
Frontend & Backend: React, Next.js, Tailwind CSS, Node.js, Express.js, REST APIs, Webhooks
Data & Systems: PostgreSQL, MongoDB, Redis, Neon, Supabase, Drizzle ORM, Prisma, Queues, Idempotency, Retries, Background Jobs, Webhook Processing
AI & Real-Time: LLM Integrations, AI Workflow Integration, WebRTC, LiveKit
Cloud, Testing & Platforms: GCP, Docker, Git, GitHub Actions, Vercel, Vitest, Playwright, Sentry, Clerk, OAuth, Stripe, Shopify, WooCommerce, CREA/DDF MLS, GoHighLevel

PROFESSIONAL EXPERIENCE

Ravan.ai | Software Engineering Intern (Full Stack) | Dec 2025 - Present

- Build and maintain **TalentStream**, a production AI-powered recruitment SaaS covering candidate sourcing through offer generation; automated recruitment, screening, communications, and workflow management reduced manual HR effort by approximately **90%**.
- Delivered **5 client projects end-to-end**, from responsive marketing sites to full-stack applications; translated requirements into production deployments, integrated GoHighLevel (GHL) workflows, and improved one client's **SEO score from 58 to 100**.
- Build and continuously maintain **Ravan.ai**, achieving a **100 Lighthouse score and sub-1-second LCP** through performance, accessibility, SEO, and frontend optimizations.
- Contributed to an MLS real-estate platform serving **14,000+ listings across 6 categories**; integrated CREA/DDF property data with CRM workflows for lead capture, tracking, and automated follow-up.
- Built the POC backend for HMEL's RBAC- and AI-enabled platform, contributing to **commercial adoption by HMEL**; later handled technical walkthroughs and knowledge transfer so other developers could continue development.

PROJECTS

Agentic E-Commerce Voice Shopping Assistant

Next.js 16, React 19, TypeScript, LiveKit/WebRTC, REST APIs

- Built an AI-powered voice shopping experience supporting product search, comparison, variant selection, cart management, and checkout-oriented actions.
- Implemented session-scoped agent-to-browser execution through an action queue and client bridge, with **14 validated agent tools/actions** grounded to the storefront.
- Integrated real-time voice communication using **LiveKit/WebRTC** and server-side Agni APIs with authenticated application endpoints and controlled browser actions.

Developer Portfolio & AI-Assisted Publishing Platform

Next.js, TypeScript, REST APIs, Vercel

- Built a responsive developer portfolio with a CMS-style publishing system supporting **draft, publish, and archive workflows**, authenticated APIs, and immutable content revision history.
- Implemented Markdown content, SEO and Open Graph metadata, structured project pages, and a **Custom GPT** integration for AI-assisted publishing workflows.
- Deployed and maintain the application on Vercel as the central showcase for production work and software-engineering projects.
