ABHIJEET SINGH SANDAL

Full Stack Software Engineer | AI Systems & Integrations

+91 88268 50701 | New Delhi | abhisand30@gmail.com | LinkedIn | Portfolio | LeetCode | GitHub

SUMMARY

Full-stack software engineer building production AI applications, RAG systems, and integration-heavy workflows. Experience in AI recruitment, conversational agents, support automation, enterprise solution design, and CRM/MLS integrations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C++, SQL

Applications & APIs: Next.js, React, Node.js, Express.js, Django, REST APIs, Webhooks

AI & Automation: RAG, AI Agents, LLM Integrations, Function Calling, Prompt/Script Configuration, Transcript Workflows

Data & Systems: PostgreSQL, Neon, MongoDB, Redis, Drizzle ORM, Prisma, Queues, Retries, Idempotency

Cloud & Tools: Docker, GCP, Git, GitHub Actions, Vercel, Vitest, Playwright, LiveKit/WebRTC, GoHighLevel

PROFESSIONAL EXPERIENCE

Ravan.ai | Software Engineer (Full-time) | Jun 2024 - Present

- Built and maintained **TalentStream**, an AI recruitment SaaS spanning candidate intake, resume scoring, screening, and hiring workflows; implemented retry-safe asynchronous jobs and idempotent webhook handling.
- Implemented **Retrieval-Augmented Generation (RAG)** capabilities in TalentStream and **workspace.ravan.ai** to bring relevant context into LLM-powered product workflows.
- Built configurable **AI agents** with scripts, prompts, and custom function calls; supported sales-conversation workflows where managers review transcripts and meeting performance.
- Automated **support-ticket analysis and triage**, reducing an hours-long manual chat-review and ticket-classification process to approximately **10 minutes**.
- Designed a **SOBHA enterprise AI integration plan** connecting transport and production operations with AI calling, WhatsApp workflows, exception alerts, ticketing, and escalations; presented the architecture to stakeholders.
- Developed frontend and workflow features for **app.ravan.ai** and **workspace.ravan.ai**; maintained Ravan.ai's public website, reaching a **100 Lighthouse score**.
- Delivered work across **5 client projects**, including CREA/DDF MLS and GoHighLevel CRM integrations and an HMEL backend POC; contributed to solution planning for international client engagements.

PROJECTS

Agentic E-Commerce Voice Shopping Assistant

Next.js, TypeScript, LiveKit/WebRTC, Agni APIs

- Built a real-time voice shopping interface for product discovery, comparison, cart updates and checkout-oriented actions.
- Implemented a session-scoped browser action queue and bridge with **14 validated agent tools** and authenticated API endpoints.

Wordbase - Learning & Study Platform

Next.js, Neon PostgreSQL, Vercel

- Built and deployed a learning platform with authenticated study cards, notes, and persistent study history.
- Developed API-backed study interactions and progress updates for repeatable, self-directed learning.

EDUCATION

B.Tech, Computer Science | 2020 - 2024 | 89.6%

Guru Tegh Bahadur Institute of Technology (GGSIPU)
